OBJECTIVE

To leverage my technical expertise in web development, strong problem-solving skills, and passion for creating user-centric applications to contribute to innovative projects. With hands-on experience in Python, JavaScript frameworks (React, Angular, Vue.js), and a proven ability to design responsive and aesthetic user interfaces, I am eager to support organizational goals while advancing my career in software development.

TECHNICAL SKILLS

Python, Java, C, HTML5, CSS3, JavaScript, Typescript, Node.js, React, Angular, Vue.js, Tailwind CSS, Redux, Webpack, GitHub, Jest, Bootstrap, Microsoft Office

TECHNICAL PROJECTS

Chai-Hut Web Application | GitHub | Site
- Integrated modern features like **parallax scrolling effects**, **animated sidebar navigation**, and **dynamic testimonials carousel** for an engaging user experience.
- Created a **menu recommendation system** with **Python** and integrated it seamlessly into the front end.
- Added accessibility features, such as semantic HTML and smooth navigation, improving usability across devices.
- Optimized site performance by compressing images and minifying CSS for faster loading times.

LiteMusic | GitHub | Site
A modern music streaming web app with search, preview playback, theme switching, and trending genres using the Deezer API.
- Integrated the **Deezer API** to enable real-time music search with album art, artist info, and 30-second audio previews.
- Designed and implemented a responsive layout with genre browsing, trending carousels, and animated MusicCards.
- Developed a custom light/dark theme toggle with localStorage persistence and lucide-react icons.
- Used Tailwind CSS and Framer Motion for clean UI styling, smooth animations, and mobile-first responsiveness.
- Deployed the app using Netlify and added a professional README to make it portfolio-ready.

EXPERIENCE
